ABOUT ME

Final-year Software Engineering student Learning in AI, machine learning, and software development. Experienced in developing academic and personal projects using Python, Java, and React. Interested in AI-driven software systems, data science, and intelligent automation. Seeking an internship or graduate software engineering position.

EDUCATION AND TRAINING

01/01/2023 – CURRENT Dhaka, Bangladesh

Bachelor of Science (B.Sc.) in Software Engineering Daffodil International University

- Software Engineering Principles and Software Development Life Cycle (SDLC)
- Object-Oriented Programming (Java, Python)
- Data Structures and Algorithms
- Database Management Systems (MySQL)
- Web Development (HTML, CSS, JavaScript, React)
- Software Design and Architecture
- Artificial Intelligence and Machine Learning Fundamentals
- Data Science and Data Mining
- Computer Networks and Operating Systems
- Version Control using Git and GitHub
- Team-based Software Project Development

PROJECTS

01/02/2026 – 01/04/2026

ChronoLogic — Neuro-Symbolic AI Productivity & Task Scheduling System

Technologies: Python, AI, Machine Learning

- Developing a research-based productivity and task scheduling system using neuro-symbolic AI concepts.
- Exploring intelligent scheduling techniques for constraint-aware task management.
- Designing the system architecture and researching suitable AI models.

01/05/2026

AgroVision — AI-Powered Plant Disease Detection & Crop Advisory System

Technologies: Python, Machine Learning

- Designed an AI-based concept for identifying plant diseases from crop images.
- Planned a crop advisory system to provide disease information and recommendations.
- Focused on applying AI to solve real-world agricultural challenges.

01/06/2025

Desktop Task Manager (Java Swing)

Technologies: Java, Java Swing

- 🔧 Built a desktop task management application using Java Swing.
- 🔧 Implemented task creation, editing, deletion, and completion features.
- 🔧 Improved understanding of Java GUI development and object-oriented programming.

SKILLS

Python (computer programming) | JavaScript | CSS & HTML

CERTIFICATIONS

NASA, 05/10/2025

NASA International Space Apps Challenge Participant

Mode of learning: Project based
