ABOUT ME

Final-year Software Engineering student Learning in AI, machine learning, and software development. Experienced in developing academic and personal projects using Python, Java, and React. Interested in AI-driven software systems, data science, and intelligent automation. Seeking an internship or graduate software engineering position.

EDUCATION AND TRAINING

2023/01/01 – CURRENT Dhaka, Bangladesh

Bachelor of Science (B.Sc.) in Software Engineering Daffodil International University

- Software Engineering Principles and Software Development Life Cycle (SDLC)
- Object-Oriented Programming (Java, Python)
- Data Structures and Algorithms
- Database Management Systems (MySQL)
- Web Development (HTML, CSS, JavaScript, React)
- Software Design and Architecture
- Artificial Intelligence and Machine Learning Fundamentals
- Computer Networks and Operating Systems
- Version Control using Git and GitHub
- Team-based Software Project Development

SKILLS

Python (computer programming) | JavaScript | CSS & HTML

PROJECTS

2026/02/01 – 2026/04/01

ChronoLogic — Neuro-Symbolic AI Productivity & Task Scheduling System

Technologies: Python, AI, Machine Learning

- Developing a research-based productivity and task scheduling system using neuro-symbolic AI concepts.
- Exploring intelligent scheduling techniques for constraint-aware task management.
- Designing the system architecture and researching suitable AI models.

2026/05/01

AgroVision — AI-Powered Plant Disease Detection & Crop Advisory System

Technologies: Python, Machine Learning

- Designed an AI-based concept for identifying plant diseases from crop images.
- Planned a crop advisory system to provide disease information and recommendations.
- Focused on applying AI to solve real-world agricultural challenges.

2025/06/01

Desktop Task Manager (Java Swing)

Technologies: Java, Java Swing

-  Built a desktop task management application using Java Swing.
-  Implemented task creation, editing, deletion, and completion features.

📖 Improved understanding of Java GUI development and object-oriented programming.

CERTIFICATIONS

NASA, 2025/10/05

NASA International Space Apps Challenge Participant

Mode of learning: Project based

GeoUniversity, 2026/04/15

Introduction to LaTeX for Scientific Writing

Mode of learning: Online
